Peninsula Air Conditioning insists on a high standard of workmanship from its' technicians. Therefore we will extend the standard 1 year installation warranty to a 5 year installation warranty, as long as the system we've installed is maintained by us (or persons authorised by us) on a regular basis; at least once a year.

What's covered in a General Service?

Ducted Systems	Split / Multi Split Systems
<ul style="list-style-type: none">• Clean all filters• Check gas levels• Check operation of indoor fan motors• Check operation of compressors and condenser fans• Check operating pressures• Inspect conditioning of condenser coils• Inspect electrical components• Check time clock setting• Check operation of damper motors• Check vee belts and adjust tension as required	<ul style="list-style-type: none">• Clean filters• Check gas levels• Check running pressures• Check all functions are working properly, e.g. heating, cooling, etc• Check air flow• Check electrical connections• Check general condition of indoor and outdoor units• Check nothing is obstructing outdoor fan

Please note: all of the above may not be required – it depends upon the type system installed

PENINSULA AIR CONDITIONING

General Service Terms and Conditions

- Any work carried out by others not authorised by Peninsula Air Conditioning may invalidate the extended warranty.
- Any damage or problems caused by the use of an accessory component or equipment not supplied by Peninsula Air Conditioning will be a chargeable repair.
- Any damage or problems that are caused by storm, fire, flood, vandalism, misuse, negligence, Acts of God, earthquake, war, vermin, foreign matter entering the equipment, or any other outside agency is not covered by warranty.
- Any damage or deterioration to any parts caused by normal weathering or corrosive atmospheric conditions (e.g. rust) is not covered by warranty. However, we will use anti-corrosive and protective solutions to help pro-long the life of your air conditioning system.
- Any costs or additional labour associated with gaining acceptable service access to equipment installed in restricted or unsafe (e.g. high) locations will be forwarded to the client.
- Equipment which has been re-installed at another location other than the original location may invalidate the extended warranty.
- Any consumable items (e.g. batteries, filters, belts) supplied with equipment, unless the item is shown to be defective at the time of purchase, is the clients responsibility.
- Any gas required to top up your system will be chargeable on the 5 year extended warranty. Gas leaks can occur from joints and flare nuts but will be checked in the regular maintenance.
- Any water leaks caused by drains not being cleared of leaves, or due to insect/animal nests is not the responsibility of Peninsula Air Conditioning. Neither is damaged caused by water back-up.
- It is the client's responsibility for the correct operation of the system installed. Call outs for incorrect usage of the system may incur a call out charge.
- Peninsula Air Conditioning will endeavour to contact you when your system is due for its regular maintenance check; however, if for any reason, we haven't contacted you, it is your responsibility to contact us to arrange for the maintenance to be carried out, if you don't and the maintenance lapses the 5 year extended warranty will become invalid.
- Warranty service call outs will be performed during our normal business hours Monday to Friday. Any work requested outside these hours cannot be guaranteed and will be charged at 'out of hours' rates.
