

Braemar Ecostar Wall Furnace

No nonsense, comfort & control.

The Braemar® WF2000 is Australia's most attractive and functional wall furnace heating system. Its elegant slim-line design makes it as discreet or as visible as you like, and with a stunning 'Ivory Sands' finish, it complements any decor.

The control panel is discreetly concealed behind a hinged panel at optimum operational height - well out of reach of curious little fingers. It features the simplest of ignition and heating control systems and a unique pilot status indicator gauge. You can set the heater on 'Auto' to operate at your desired comfort level or switch to 'boost' for rapid initial heat-up.

To turn the heater on, you simply turn the control dial to the heat setting you want - and that's it! The Braemar® Wall Furnace is available in two large output models. The WF2000 30MJ is ideal for most domestic applications and will heat up to *90m², making it a very effective replacement for older 40MJ units. The WF2000 40MJ is designed for light commercial applications such as halls or large rumpus rooms and will heat upto *110m².

- Simple to use
- Proven reliability
- User friendly
- Durable

* Dependant on unit position, home layout and insulation

Whole of Home - Ducted Gas Heating

Super efficient - Ultra powerful - Unmatched control

Gas ducted heating is far cheaper to run than any other form of central heating system, including reverse cycle air conditioning. So not only will your home stay nice and warm during winter, you'll save money on heating costs.

Warmth to suit everyone - Spectrolink™ Multizone™

Imagine being able to simultaneously set different temperature zones within your home, allowing increased comfort at lower running costs. Make the baby's room a bit warmer than the lounge? Need more warmth in just the upstairs bedrooms? With Braemar's amazing Spectrolink Multizone system, its easy!

SEELEY INTERNATIONAL

Gas Space Heating

The star performer!

Braemar
HEATING COOLING
ECOSTAR

braemar.com.au

The superior technology built into the Braemar Ecostar's range of power flued gas space heaters make Braemar the ideal choice in room heating – offering the ultimate in comfort combined with stylish design.

Introducing the amazing new Braemar Gas Space Heating Range

When it comes to genuine running cost savings, advanced safety features and easy to use controls, it has to be Braemar Ecostar.

Braemar Ecostar's power flued gas space heaters boast an amazing, market leading 4.8 star gas energy rating. Saving you money and running costs.

Trusted Australian Company

Australians have been coming home to the wonderful warmth of Braemar gas heating for more than 50 years. Australian made and wholly Australian owned, Braemar's reputation as the leading brand of gas heating is well deserved because of its world leading innovation, engineering excellence and the stand alone quality of its manufacturing. Braemar is the brand you can trust.

Saving you money

Costs less to run. Power flued space heating is one of the most economical forms of heating and Braemar Ecostar SH18 and SH25 space heaters have the highest star ratings of any comparable product. Each heater's energy efficiency is measured independently with star ratings. The higher the star rating, the more energy efficient the heater is. The more energy efficient, the more you save on running costs. This is why Braemar Ecostar space heaters have in-built technology to ensure Braemar's space heaters have a high energy efficiency rating of 4.8 stars. **Braemar encourages you to compare this star rating with competitor brands.**

Safety features

With no unhealthy exhausts circulating in the air, no hot surfaces inside the home, no messy ashes or fumes and no smelly chimneys Braemar space heating is the perfect choice for your family's heating needs. To ensure your safety further, Braemar's power flued space heaters include:

- Overheat safety switches
- Self diagnostic control system
- Cool to touch cabinet
- Child lock

Better for the environment

The build-up of greenhouse gas emissions is a major concern for us all – which is why natural gas is a responsible choice for home heating needs. By installing a Braemar Ecostar space heater you'll do more than just save on running costs, you'll be contributing towards a healthier planet. A natural gas space heater has the lowest carbon emissions of any other form of space heating, according to "Choosing a heating system".

SH25	1050	500	167	262	4.8	17	25	6.0	57	75	85

Fresh Air

Braemar Ecostar space heaters are the ideal heating solution for asthma and allergy sufferers*. Unlike unflued gas heaters which increase the level of pollutants in a home, Braemar power flued space heaters expel exhausts outside the home so that inside air remains clean and healthy.

Product to suit you

Braemar Ecostar power flued space heating is available in two sizes to meet the requirements of your heating needs. The 18 MJ unit heats up to 62m² and the 25MJ unit heats up to 85m². Consult your local Braemar specialist to discuss the unit that best suits your home.

Remote control

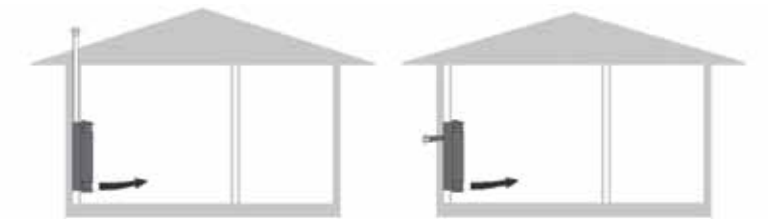

Your Braemar Ecostar power flued space heater has an optional remote control allowing you to operate your unit from anywhere in the room. The remote control also allows you to set up a full seven day programmable timer.

Installation options...

Flue through rear wall or up the wall cavity

External Wall

Inbuilt - Vertical flue or Rear flue

Internal Wall

Inbuilt - Vertical flue - with or without rear register

External Wall

Console - Rear flue
