

G61 Series High Efficiency Gas Furnace

Fast and reliable
energy efficient heating

Exclusively distributed by

G61 Series High Efficiency Gas Furnace

Offering an impressive 5.3 star rating, the Lennox G61 Series High Efficiency Gas Furnace is engineered to deliver the perfect balance of temperature and humidity in every room of your home. When compared to electric heating, the warmth from natural gas is not as drying and keeps you warmer in winter.

A variable speed motor provides variable control of the air flow throughout your home. This delivers two levels of heating - one for mild days and the second for colder days to ensure a consistently comfortable indoor environment.

Quality Heritage

Lennox has been at the forefront of innovation and design since 1895. With over 120 years of manufacturing experience, you know when you choose Lennox, you'll get more than just a piece of equipment. You get a completely reliable system from a manufacturer that is committed to providing you with the best in quality home comfort.

Engineered For Comfort & Efficiency

The G61 Series is a high efficiency gas furnace with a star rating of 5.3. Among its energy efficient features is a variable speed motor that uses about two-thirds less electricity than a constant speed motor.

Constructed to a high standard of design, engineering and quality, the G61 Series Gas Furnace is robust to withstand outdoor installations. Unique sound absorbing insulation panels are included for quiet operation inside the home.

Lennox confidently stands behind its product with a comprehensive 5 year parts and labour warranty for domestic applications.

Optional Lennox Add-on Cooling

Lennox's superior design and technology allows you to enjoy the comforts of cool air in summer, travelling through the same duct work as your gas ducted heating system. This can be set up at the time of installation, or added to your heating system further down the track.
